PROFESSIONAL SUMMARY

Computer Science graduate (Hazara University) with hands-on project experience in AWS cloud infrastructure, Terraform, Linux, Git, GitHub Actions, and CI/CD workflows. Developing practical skills in Infrastructure as Code, cloud security, containerization, and automated deployments. Seeking Junior Cloud Engineer and DevOps Engineer roles with a focus on infrastructure automation, security, and reliable cloud deployments.

EDUCATION

Bachelor of Science in Computer Science Oct 2022 – Jun 2026

Hazara University | Mansehra, Pakistan

EXPERIENCE

Cloud & DevOps Projects, Self-Directed Learning Jul 2026 – Present

Mansehra, Pakistan

- **AWS Infrastructure:** Practiced provisioning AWS resources with Terraform, including VPCs, subnets, route tables, security groups, IAM roles, and EC2 instances.
- **Infrastructure as Code:** Worked with Terraform workspaces and remote state management using Amazon S3 and state locking.
- **CI/CD Automation:** Developed GitHub Actions workflows for Terraform formatting, validation, and environment-specific infrastructure deployment.
- **Cloud Security:** Practiced GitHub Actions OIDC authentication for AWS access; explored IAM, AWS Secrets Manager, Systems Manager Parameter Store, and AWS KMS.
- **Containerization:** Practiced Docker image workflows and publishing images to Docker Hub; explored container deployment on Amazon ECS Fargate.
- **Deployment & Monitoring:** Practiced blue-green deployment concepts, deployment approval workflows, and Amazon CloudWatch logging.
- **Linux & Networking:** Practiced Bash scripting, file permissions, user and group management, process monitoring, SSH, DNS, IP addressing, ports, and network troubleshooting.

TECHNICAL SKILLS

- **Cloud:** AWS, VPC, EC2, S3, IAM, RDS MySQL, Application Load Balancer, ECS Fargate
- **Infrastructure as Code:** Terraform, workspaces, remote state management
- **CI/CD & Version Control:** Git, GitHub, GitHub Actions
- **Containers:** Docker, Docker Hub
- **Cloud Security:** IAM, OIDC, AWS KMS, Secrets Manager, Systems Manager Parameter Store
- **Operating Systems & Scripting:** Linux, Bash
- **Monitoring:** Amazon CloudWatch

PROJECTS

AWS Fargate Full-Stack Flower App (In Progress)

Full-stack cloud application on AWS with Terraform-managed infrastructure.

- Developing a React/Vite frontend and Node.js/Express backend with an Application Load Balancer and a private Amazon RDS MySQL database.
- Defining the AWS infrastructure with Terraform.

React Blue-Green Production Pipeline

AWS deployment workflow practicing blue-green release strategy.

- Practiced AWS infrastructure and application deployment workflows using Terraform, versioned container images, and blue-green deployment concepts.

Cloud Deployment Enterprise Pipeline

Terraform and GitHub Actions pipeline for multi-environment deployment.

- Worked on Terraform-managed AWS infrastructure and GitHub Actions workflows, including OIDC authentication and environment-specific deployment processes.
